Pachinko Machine Cabinet
Designed by Ken Hoke - 02/2006
DeltaCad Pro Ver. 5

All parts glued with wood glue and fastened with 1 5/8" drywall screws. Preadrill and countersink all holes then fill with wood filler after dry. Sand smooth, prime and paint.

Gluing is critical for long-term strength. Don't skip the glue!
Hint: Set your table saw to 20 1/2" and cut all 20 1/2" parts in one session to ensure a precise, accurate fit. Then rip the boards to the proper width.
Plywood Slide Gate for 1 1/2" PVC down tube.

constructed with 1/8" plywood and wood glue.
Cut holes in the three main pieces before gluing.

"Sandwich" is glued with wood glue and clamped.

Use glue sparingly so no glue oozes out of the sandwich into the interior of the slide case.

Sliding piece is sanded until it inserts and slides easily (< 1/8" thick)

Hole for attaching dowel

Overhang

Cut holes in the three main pieces before gluing.
